Claims 7, 9, 10, 14, and 19-21 are pending and rejected.

Applicant response filed in paper no. 7 is hereby acknowledged. Amendments are entered.

Arguments are not found persuasive therefore, 103 rejection is maintained for the same reasons as set forth in our previous office action. It is obvious to combine two components with same utility

1. It is *prima facie* obvious to combine two compositions each of which is taught by the prior art to be useful for the same purpose in order to form a third composition that is to be used for the very same purpose; the idea of combining them flows logically from their having been individually taught in the prior art. In re Kerkhoven, 205 USPQ 1069.

2. There is nothing inventive in a composition of old ingredients of known properties with each ingredient functioning individually as expected. In re Sussman. 58 USPQ 262.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 7, 9, 10, 14, and 19-21 rejected under 35 U.S.C. 102(b) as being anticipated by Heuer et al. (US Patent 5,972,971).

See in claim 1, compound b) which is imidacloprid and in claim 3, compound d) which is tebuconazole.

Same combination of compounds is claimed in present invention for preserving woods or timber products derived from wood (see claim 5).

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper time wise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 1616

Claims 7, 9, 10, 14, and 19-21 rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-5 of U.S. Patent No. 5,972,971. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims of US '971 is drawn to a method and composition for preserving wood or timber products by using the combination of imidacloprid (compound listed as b in claim 1) and an azole compound. Claim 3 further give a list, which includes tebuconazole (compound listed as d). US '971 claims synergistic compositions.

Instant claims are narrower and selection of the claims of US '971.

It would have been obvious to one skilled in the art by reading the disclosure of US '971 to prepare a composition by combining imidacloprid and tebuconazole for preservation of wood or wood products because the reference teaches the same use.

Present invention has the same assignee.

No claim is allowed.
